

" God and the Devil from Reich to Eva`s Guide "

John Pierrakos` Roots

lecture

by Lucia Helena Alencastro

From the most controversial part of Reich's work, alive in their book *Ether, God and the Devil*, we have bases to understand how Pierrakos made his transition to Core Energetics when he found Eva`s guide wisdom. We will enjoy the beautiful sum made with Reich and this new dimension of teaching that came to expand the life and work of John Pierrakos. Reich's conclusions on the existence of a form of energy (Orgone) that influences from the functioning of living beings to the movement of the planets and the climate, inspired Pierrakos`s desire to go further in the field of energy. We will also understand the body division into head, thorax and pelvis as the habitations of God, Man and Devil in the body, focusing on the three major strangulations in our body (neck, diaphragm and anus). Understanding these armors as evil we will also receive that evil is only a distortion of the only major creative force of the universe. To locate and accept evil is the only way to redirect this "energy flowing" to its pure origin. From the energy point of view, its frequency is slow and condensed. From the point of view of consciousness, evil is alienation, is the result of resistance to God Within.
